Ben Har-El

President

Dear Operator:

There are 1.5 Million CHILDREN REPORTED MISSING each year in America. Some of these children are players in our Arcades.

We at Konami feel that it is our responsibility to participate in combating this Real and Growing problem. Won't You Help Us Find The Children?

Konami is working in cooperation with CHILD FIND, INC., a not-for-profit corporation organized to aid parents, legal authorities and the F.B.I. in the finding of missing children. In an effort to do so, we have attached to our kits and video games, a poster and a decal showing photos of children that are listed with Child Find as missing.

Because of the tremendous exposure your gameroom or location can provide, we ask that you PROMINENTLY DISPLAY the posters and place the decals on each of the Konami games. We, and the parents of these children are very grateful for any help that you give us in assisting this extremely important program.

If it is possible for you to assist Child Find further by sending a tax deductible donation or if you would like to volunteer any time or services, please contact Child Find at:

CHILD FIND, INC.
P. O. BOX 277
New Paltz, NY 12561
Phone: (914) 255-1848

Again, thank you very much for helping us to help find the children. We deeply appreciate your concern and cooperation.

Best regards,

KONAMI INC.

Ben Har-El
President

PLEASE DON'T FORGET TO DISPLAY THE POSTERS AND DECALS!

TABLE OF CONTENTS

CONVERSION KIT CONTENTS:

- **MAIN PRINTED CIRCUIT BOARD**
- **P.C.B. CAGE (FCC REQUIRED)**
- **CONNECTING WIRING HARNESS**
- **6 SETS — BUTTON ASSEMBLIES**
- **8-WAY JOYSTICK**
- **MARQUEE (HEADER)**
(1/8" acrylic sheet)
- **ONE SET SIDE PANEL GRAPHICS (left & right)**
- **CONTROL PANEL OVERLAY**
- **CONTROL PANEL DECALS**
instruction decals/button decals (2 sets)
- **FCC WARNING LABEL**
- **MANUAL**
- **REGISTRATION CARD**

REPLACEMENT ACCESSORIES ARE AVAILABLE THROUGH YOUR DISTRIBUTOR.

**THIS KIT USABLE FOR COCKTAIL AND UPRIGHT VIDEO GAMES WITH A
RASTAR SCAN MONITOR WHICH IS OR CAN BE MOUNTED HORIZONTALLY.**

RUSH 'N ATTACK INTRODUCTION

KONAMI CONVERSION KITS are the most complete conversion kits available today. Every detail has been carefully considered, designed and packaged to provide you the means of easily producing a professional conversion.

These kits have all the accessories to easily convert your UPRIGHT or COCKTAIL video game.

We strongly urge you to FULLY STUDY this instruction manual BEFORE you begin your conversion. It contains step-by-step instructions, schematic diagrams and suggestions on how to install your Konami Conversion Kit and maximize your profits.

RUSH 'N ATTACK can be installed in any horizontally mounted raster scan monitor game.

Everything you will need to construct your new game is provided in this kit. All accessory parts — wiring harness, joystick, etc. are custom made for RUSH 'N ATTACK by top engineers experienced in the coin-op industry. An 8-way joystick (as provided) MUST be used.

The Player Instruction and Button Control decals are made of a non-destructible acrylic material specifically to keep the player from peeling them off. Should you convert a cocktail table game, RUSH 'N ATTACK is supplied with 2 sets of button decals.

SAVE YOURSELF TIME AND MONEY

The following P.C.B.'s are interchangeable with RUSH 'N ATTACK P.C.B.'s

Super Cobra • Scramble • Pooyan • Locomotion • Circus Charlie • L'il Hustler

Juno First • Time Pilot • Gyruss • Tutankham • Turtles • Super Basketball • Mega Zone

Pandora's Palace • Time Pilot '84 • Track 'n' Field • Hypersports • Roadfighter • Yie-Ar Kung Fu • Kicker

Mikie • Frogger (60% — check pin print-out) • Amidar • Roc 'N Rope • The End

In other words, your RUSH 'N ATTACK will plug right into existing edge connectors of the games listed above — be sure to check your pin print-out. (Keep in mind that Rush 'N Attack is designed as a horizontal game.)

DUAL CONTROL

By moving SW#2 of dip switch bank #3 to the "on" position, you are now in the dual control upright mode. This allows you to set up an upright game with two sets of controls rather than one set. The first set of controls should be hooked up to the 1P set of wires; the second set to the 2P wires (see wiring diagrams). Each player still challenges the "computer-controlled" opponent (alternating play). This does not allow simultaneous interaction of players on the video screen.

SINGLE CONTROL LAYOUT

DUAL CONTROL LAYOUT

PUTTING YOUR BEST GAME FORWARD

PREPARATION:

For best results, all old graphics should be removed completely from the cabinet. "Stick-on" graphics can be removed by using a hairdryer or hot air device. The heat from the dryer will loosen the adhesive, allowing you to easily peel them off — any adhesive residue can be cleaned off with acetone and a soft dry cloth. (DO NOT USE ACETONE ON SURFACES PAINTED WITH FLAT PAINT.)

TOOLS YOU NEED:

1. Foaming Aerosol (such as "Windex").
2. Soft Squeegee.
3. X-Acto Knife.

SIDE PANEL DECALS

1. Spray area of cabinet where Side Panel decals are to be applied with foaming aerosol or a mild soap solution.
2. Remove protective backing from decals.
3. Position decals into place.
4. With a soft squeegee, beginning from the center of the decal, slowly and evenly press out excess foam until you achieve a smooth finish.
5. Allow to set approximately 2 to 3 hours before handling. Maximum adherence is achieved in 48 to 72 hours.

6. Trim side decal to fit your cabinet.

CONTROL PANEL OVERLAY:

1. Refer to Recommended Control Panel Layout on page 2.
2. Drill any new holes needed.
3. Plug any holes that will not be used. (A permanent epoxy filler works well for this step.)
4. Pre-position the overlay prior to removing the backing.
5. Slowly apply the overlay — inch by inch on the control panel, removing the backing as you apply it.
6. Once it's in place, by using an X-Acto knife, cut around the button and joystick placements.

INSTRUCTION/BUTTON DECALS:

Apply the Player Instruction, Button and 1 Player/2 Player decals in their respective positions. Apply pressure liberally. Allow to set as long as possible before putting game on location.

NOTE: Maximum adherence is achieved in 48 to 72 hours.

FCC WARNING LABEL:

FCC Warning Label must be applied to the outside of the cabinet near the line cord entry.

MARQUEE

(WEAR PROTECTIVE GLASSES WHILE TRIMMING MARQUEE)

1/8" Acrylic Marquee should be cut to fit your game. DO NOT remove protective mask until this is done.

One way of cutting your Marquee is as follows: (Be sure to protect painted side of Marquee from any surface which may scratch or mar finish).

CUTTING WITH A KNIFE OR SCRIBER

Acrylic sheet up to 3/16" thick may be cut by a method similar to that used for cutting window glass. Use a scribe of some kind — a scribing knife such as the one pictured, a metal scribe, an awl, or even a sturdy craft knife — to score the sheet. Draw the scribe several times (7 or 8 times for a 3/16" thick piece) along a straight edge held firmly in place. It is best not to remove the protective masking. Make the cuts carefully using firm, even pressure. For best results make each stroke cleanly off the edge of the sheet.

Then clamp the acrylic sheet or hold it rigidly under a straight edge with the scribe mark hanging just over the edge of a table. Protect your hands with a cloth, and apply a sharp downward pressure to the other side of the sheet. It will break along the scratch. Scrape the edges to smooth any sharp corners. This method is not recommended for long breaks or thick material.

Always draw the scribing knife along a straight edge.

Break sheet over edge of table after scribing.

P.C.B. CAGE INSTALLATION

Konami, Inc. now supplies a new style P.C.B. cage which is superior to old style cages because of ease of installation. The cage is made of a 32 point stem-stock which is fire retardant.

TO INSTALL THE CAGE:

1. Open cage bottom and secure to desired P.C.B. position.
2. Install printed circuit board inside cage using wood screws, screwed through the cage bottom into cabinet side.
3. Close the cage over printed circuit board and secure with latch on cage.

RUSH 'N ATTACK: MONITOR SPECIFICATIONS

Rush 'N Attack requires a horizontally mounted monitor. It also generates composite negative sync. If your monitor is composite positive sync, you will have to change to composite negative sync.

- (1) To alternate composite positive sync to composite negative sync, use 7404 IC or 74LS04 IC. The signal on the output pin from the P.C.B. is a combination of H-sync and V-sync.

NOTE: Please refer to Figure 2.

FIGURE 2:

(+ 5V and GND should be taken out of the P.C. Board.)

- (2) Separate Sync modification for Rush 'N Attack if your monitor has "Separate Sync" input. (For example "Electrohome brand" and Wells-Gardner brand.")

Step 1

WIRING HARNESS

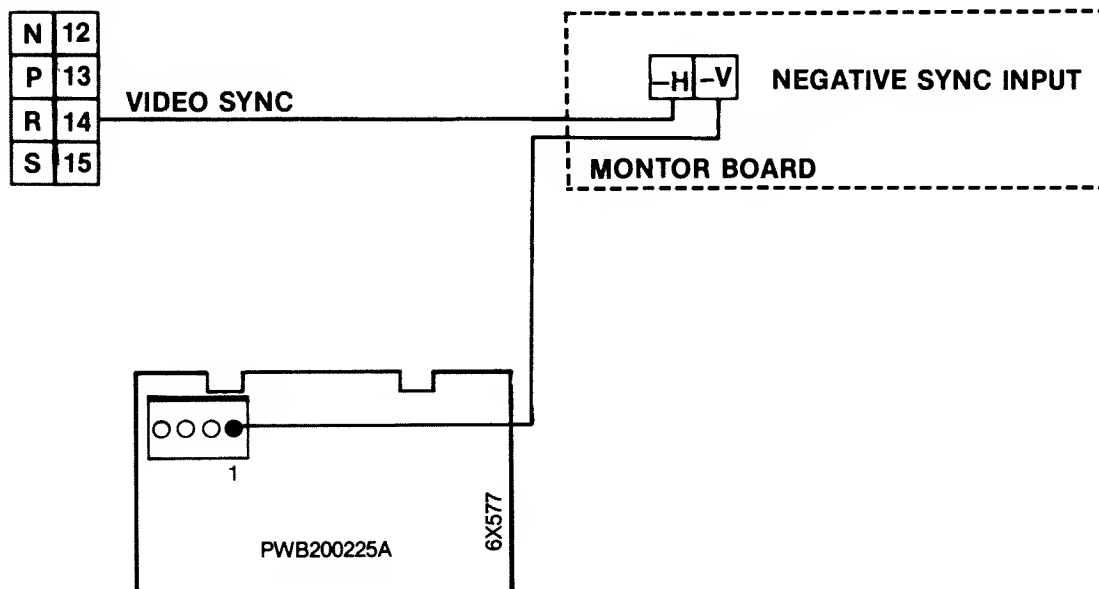

If the picture is still not stable. . .

Step 2

Prepare Hook-up wire. (For example "Electrohome brand.")

RUSH 'N ATTACK: MONITOR INFO.

SERVICE INSTRUCTIONS

NOTE: All monitors are equipped with automatic degaussing coils (L701) which demagnetize the picture tube every time the monitor is turned on after being off for a minimum of 5 minutes. Should any part of the chassis become magnetized it will be necessary to degauss the affected area with a manual degaussing coil. Move the coil slowly around the CRT face and all surrounding metal parts. Then slowly withdraw for a distance of 6 feet before turning off.

1.0 BLACK LEVEL CONTROL ADJUSTMENT

This control has been set at the factory and should not need further attention, however, when the game is connected a slight adjustment of VR201 may be necessary to obtain the proper black level (the black portion of the picture just extinguished).

2.0 VERTICAL SIZE (HEIGHT)

Location of this control is shown in Fig. 1. This control must be adjusted slowly, if necessary, until the picture or test pattern attains the correct vertical proportions.

3.0 CIRCUIT PROTECTION

A 4.0A pigtail fuse, mounted on the Main Board has been provided to protect the Power Output Circuit.

4.0 FOCUS

Adjust the focus control, located on the HV unit (T352), for maximum over-all definition and fine picture detail.

5.0 HORIZONTAL HOLD CONTROL ADJUSTMENT, VR351 (See Fig. 1)

A warm-up period of at least five minutes should be allowed before alignment is carried out. With the monitor being driven from the game signal, short TP601 to TP31. Adjust VR351 until the picture stops sliding horizontally. Remove the short.

6.0 HORIZONTAL VIDEO POSITION

If the video is off center on the raster some compensation can be made by adjusting this control.

7.0 VERTICAL RASTER POSITION ADJUSTMENT

If the video is off center vertically, (short dimension of picture tube) some compensation can be made by moving the vertical raster position adjustment jumper to either positions "U" or "D".

8.0 HORIZONTAL RASTER POSITION ADJUSTMENT

If the video is off center horizontally (long dimension of the picture tube) some compensation can be made by moving the horizontal raster position adjustment jumper to either positions "R" or "L".

9.0 HORIZONTAL WIDTH ADJUSTMENT

The horizontal width coil is a hexagonal tuning tool adjustment. This control must be adjusted slowly, if necessary, until the picture or test pattern attains the correct horizontal proportions.

* KONAMI GAMES ARE ALL NEGATIVE COMPOSIT SYNC. USE THE THREE PIN CONNECTOR ON THE MONITOR.

RUSH 'N ATTACK: TECHNICAL INFORMATION

(1) Required Power Capacity

- + 5V DC 7A or more.
- + 12V DC See Figure 1 below

Figure 1:

SPEAKER				
Required Power Capacity	12V 1A	12V 2A	12V 2A	Not Applicable

- (2) Signal output
- R(red) analog, positive
 - G(green) analog, positive
 - B(blue) analog, positive
 - Sync. H-V composite negative

DIAGNOSTIC PROCEDURES

AUTOMATIC SELF-TEST — Upon “Power On”, this system will automatically test ROMS and VIDEO RAMS. The screen will display pass or fail conditions as follows:

TEST PASSED	TEST FAILED	IF TEST FAILS
RAM OK	RAM BAD	RAM = 10 E
ZRAM 1 OK	ZRAM 1 BAD	ZRAM 1 = 8 E
ZRAM 2 OK	ZRAM 2 BAD	ZRAM 2 = 8 E
ROM 1 OK	ROM 1 BAD	ROM 1 = 7 C
ROM 2 OK	ROM 2 BAD	ROM 2 = 8 C
ROM 3 OK	ROM 3 BAD	ROM 3 = 10 C

USER INFORMATION
WARNING
F. C. C. REGULATION COMPLIANCE

THIS KIT IS INTENDED FOR USE ONLY ON COIN-OPERATED VIDEO GAMES MANUFACTURED AFTER OCTOBER 1, 1983 WHICH HAVE BEEN VERIFIED FOR COMPLIANCE WITH REQUIREMENTS IN PART 15 OF F.C.C. RULES FOR A CLASS A COMPUTING DEVICE.

IMPROPER CONNECTION OF THIS KIT OR CONNECTION TO ANY OTHER GAME NOT SO MANUFACTURED OR VERIFIED FOR COMPLIANCE MAY CAUSE UNACCEPTABLE INTERFERENCE TO RADIO AND T.V. RECEPTION, REQUIRING THE OPERATOR TO TAKE WHATEVER STEPS ARE NECESSARY TO CORRECT THE INTERFERENCE.

THE P.C. BOARD CAGE SUPPLIED WITH THIS CONVERSION KIT MUST BE UTILIZED AND TERMINATED TO GROUND AT THE TIME OF INSTALLATION.
